This action is in response to applicants' amendment of 20 May 2008. The amendments to the claims have overcome the art rejections. The indicated allowability of claim 17 is withdrawn in view of the amendment to claim 1.

The disclosure is objected to because of the following informalities:

The specification teaches the ligand contain a phenolic hydroxy group or moiety. This group has the formula $-C_6H_3(OH)_2$. None of the formulas on page 17-22 contain this group even though the specification says they do. Appropriate correction is required.

Claims 1, 5, 8, 14, 16, 17 and 62-65 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Claim 1 has been amended to state the ligand has a phenolic moiety. Claim 8 was amended on 29 May 2007 to state the ligand has a phenolic moiety. These amendments are new matter since the originally filed disclosure teaches these ligands contain a phenolic hydroxy moiety. Thus these claims and the claims which depend from them contain new matter.

Claims 13 and 61 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

None of the claimed moieties in claim 61 contain a phenolic moiety which has the formula $-C_6H_4OH$, which is the same as hydroxyphenyl. Claim 13 is indefinite since it 8-

hydroxyquinoline and hydroxybenzoquinoline ligands which do not contain the required phenolic moiety.

Claims 11, 12 and 66-73 are allowable over the cited art of record for the reasons given in the previous action.
